

An ASME Journal Article Created Using L^AT_EX₂_ε in ASME Format for Testing Your Figures

Harry H. Cheng

Professor, Fellow of ASME
Integration Engineering Laboratory
Department of Mechanical Engineering
University of California
Davis, California 95616
Email: hhcheng@ucdavis.edu

J. Michael McCarthy*

Editor, Fellow of ASME
Journal of Mechanical Design
Email: jmmccart@uci.edu

Third Co-author

Graduate Research Assistan, Student Member of ASME

Fourth Co-author†

Title, Member of ASME
Department or Division Name
Company or College Name
City, State (spelled out), Zip Code
Country (only if not U.S.)
Email address (if available)

This is the abstract. This article illustrates preparation of ASME paper using L^AT_EX₂_ε. An abstract for an ASME paper should be less than 150 words and is normally in italics. Please use this template to test how your figures will look on the printed journal page of the Journal of Mechanical Design. The Journal will no longer publish papers that contain errors in figure resolution. These usually consist of unreadable or fuzzy text, and pixilation or rasterization of lines. This template identifies the specifications used by JMD some of which may not be easily duplicated; for example, ASME actually uses Helvetica Condensed Bold, but this is not generally available so for the purpose of this exercise Helvetica is adequate. However, reproduction of the journal page is not the goal, instead this exercise is to verify the quality of your figures. Notice that this abstract is to be set in 9pt Times Italic, single spaced and right justified.

Nomenclature

- A You may include nomenclature here.
α There are two arguments for each entry of the nomenclature environment, the symbol and the definition.

The primary text heading is boldface and flushed left with the left margin. The spacing between the text and the

heading is two line spaces.

1 Introduction

According to Yu [1], there is everything else.
According to Hiei [2], there is everything.
According to Nederman [3], there is something.
According to Fatsikostas [4], there is nothing.
According to Koenig [5], there are none.
According to Pryor [6], there is a little.
According to Björklund [7], there is something else. According to Wictorin [8], there is everything else.
